INTRODUCTION

GETTING STARTED

Effective Use of Your Pager

Your pager can help you keep in contact with everyone important to you. By giving your pager number to your business associates, family, and friends, you can be contacted whenever needed.

If you have a cellular phone, give your pager number instead of your cellular number. Then you can decide who to call back on your cellular phone without paying for incoming calls.

Battery Information

Your pager is designed to operate with a single AA-size alkaline battery (carbon zinc batteries are not recommended). See the diagram on the following page for the battery door location.

Installing/Replacing the Battery

To install or replace the battery, hold the pager face down and proceed as follows:

- 1 Unlock the battery door by sliding the door latch away from the battery door.

- ② Slide the battery door in the direction of the arrow (toward the outer edge).
- ③ Lift the battery door away from the housing to remove it.
- ④ Lift the battery out of the battery compartment, taking note of the positive (+) and negative (-) markings on the battery and the pager housing.

V700 Battery Replacement (rear view)

- ⑤ To install a new battery, reverse this procedure, taking note of the positive (+) and negative (-) markings.

While you are waiting for the message to reach your pager, refer to page 13 for information about how to read a message. If your pager does not receive the message within a few minutes, contact your service provider. After you've tested the pager, read the rest of this guide to learn about the many useful features of your new pager.
